Nora	Sheriff	A-KLAW
Jim	Skeen	SMUD
Chuck	Solt	Lindh
Gerry	Torribio	SCE
Mohammad	Vaziri	PG&E
Chuck	Whitaker	Endecon Engineering

1. The next Working Group Meeting (No. 51) will be held in San Diego, on Monday, January 26, 2004. The CADER conference is to be held in San Diego on January 27 and 28.

2. PG&E is planning to hold an Interconnection Workshop for its customers and interested developers on December 10 in San Ramon.
3. There was a short discussion on the monthly Utility status report sheets. The Utilities will attempt to standardize the format for the reports. Also, they will start to list (after the fact) those interconnections that required only Initial Review, those that were approved after Supplemental Review, and those that required an interconnection study.
4. The rest of the day was used to review proposed changes to Rule 21. A compilation document was prepared, and marked up line by line. There was very good progress through the process meeting. Subject to approval by the technical group, Sections A through E were approved by the process group.
5. Sections F, G and H will be tackled at the San Diego meeting in January.
6. The Technical Group reviewed the technical changes suggested to Rule 21, mainly those stemming from IEEE 1547. Technical Group's progress was helped by the special two day meeting held in San Diego in November.
7. The revised Application Form will be presented for review at the January San Diego meeting.
8. The Action Item List will be reviewed following approval of the revisions to Rule 21 and the actions prioritized and tackled at that time.
9. Tom Dossey received a promotion and is moving on. We will miss him!

Respectfully Submitted.

Edan Prabhu
